

Each source is checked on a daily basis to give the most up to date information, with real time alerts from the most important sources to ensure no critical information is missed. The Horizon Scanning team then read and analyse the information, record what is relevant to our clients' focus then finally the Information is collated and distributed to our clients at an interval that is suitable for them through ALSolutions.

Tailor Made to Your Needs.

Our Horizon Scanning service is managed by a dedicated group of experts, who use their knowledge and experience identify themes that might be relevant to our clients and could influence shape the Industry future.

ALS aim to understand client's requirements in order to guide the gathering of information and avoid potential information overload.

- * An ad-hoc subscription with fortnightly notification, where ALS select the topics that are deemed to be relevant to the client's Industry/ Business.
- * A bespoke subscription where the client defined the frequency of the notification and scope of the topics.

We always remain open to receive feedback from clients, enabling them to offer their views concerning ALS horizon scanning process and thereby create a basis for making any necessary adjustments and corrections, ensuring that we can provide the best data analysis and service.
